

To record to a USB Flash Drive please follow the following steps:

Turn on display.

Press the "On/Off" button the on side of the display. Lights will flash, wait until they are solid.

**Press the "On/Off" button until there is only one blue light in the lower section of three lights (it may come on with only one but, if it doesn't, you must press "On/Off" until only one is lit).**

Insert Flash Drive. Lights will run, when they are solid (one in top section and one in bottom) make sure the bottom section still has one blue light.

Press and hold the "Rec" button until the red light comes on. It is now recording.

To stop recording, hold the "Rec" button down until the red light goes out (2-3 seconds).

To turn off recorder, hold down the "On/Off" button.
